

Woodcarving: 12 Original Projects

This is an illustrated step-by-step guide to carving a variety of original pieces from wood in both sculpture and relief. It contains 12 projects to suit all levels of ability, which are arranged so that the carver is able to progress methodically from elementary to more advanced work, improving on existing skills and exploring new ones. The book includes advice on choosing materials and equipment, sharpening tools, the techniques for each piece, drawing, and the use of maquettes and methods of finishing. The author Jeremy Williams is an experienced woodcarver and teacher of the craft and his work is known worldwide. He has also written *Woodcarving - Step by Step Techniques*.
