Discover that you need bank data and ratings on the go and not just at your desk? What you need is a comprehensive and consistent reference guide to all FDIC-insured banks that is available both via the desktop and on your wireless mobile device. And all for a price that wont break the bank. My name is Howard Lothrop and Ive been in the financial risk management and banking industry for over 30 years. Ive put all of that experience and analytical firepower to work creating my bank ratings report service. Each ratings report gives you over 29 key bank performance metrics. Instead of a mind-numbing static box of numbers and ratios, the Echo Partners professional bank ratings system provides a wealth of quality trend, peer and financial data presented in easy to understand graphs. Combining the trend data, which shows the history of the banks performance, with our foward looking interest rate risk information, which forecasts future bank earnings performance, results in a rich understanding of the banks true financial position. The results are summarized in our 1 - 5 ratings system. The Echo Partners bank ratings system uses a five star rating system to signify bank health. We rank each bank from 1 to 5, with 5 stars being best. Most banks should generally be rated three or four stars. Exceptionally strong banks may be rated five stars. Weakened

institutions will typically be rated with only one or two stars. Exclusively through Amazon, I am delivering my proprietary bank ratings service for the lowest price possible to reach the widest possible audience. At this price, you really owe it to yourself to try our ratings publications.
