I am a time served joiner whos been working in the trade for over 10 years now. I reckon on those figures alone Ive spent ?1300 so far on batteries alone, thats not including the price of replacing my drills.This is what prompted me to research and write this guide.When you invest in this guide you will receive:> A step by step guide on how to bring back to life any NICD battery- Its important to note that you can do this with nothing more than what is already in your garage and a spare fifteen minutes. It will bring back the oldest of batteries and give them a second lease of life.> A plain English guide written by someone who has tested and uses the process> Practical advice on how to charge, store and use your battery to gain maximum effect> An illustrated approach using basic materials that you most probably already have (or can borrow!).You WONT Receive:> A science filled guide that needs a degree to be understood> A guide to a process so complex that you need more than one person to make it work > A book thats going to sit on your shelf after you have

used it only once! You Need This If...> Your charger indicates your battery is full but it's not.> You charge your battery but it dies quickly or underperforms.> Battery has been stored for months and not used.> You're sick of buying replacements!> You have old & so-called dead batteries sitting in the garage!> You think you could earn extra cash fixing people's batteries (this idea alone makes it worth it... imagine fixing other people's drill batteries for a ?15 fee. Saves them money!) What To Expect From This Guide:> A 98% Success Rate... hey, some are just too far gone.> No special tools required - you can do this with some stuff from your garage.> Restore any NiCD Rechargeable Battery (for any power tool) in minutes.> Works on all voltage sizes from 1.2v to 36v. Don't just take my word for it; here's what our customers say: I used the Easy battery Fix and was stunned. I work in the automotive industry, so I am used to outrageous claims!
