

Howlings from the Pit may be Dr. Lisiewskis finest work to date. For both the beginning and advanced students of occultism, it lays bare what practical magic is all about. A veritable modern magical grammar, Howlings takes the reader step-by-step through the mental, psychological and physical preparations required by the Fathers of the Grimoires, the authors of the classical books on ceremonial magic which include The Heptameron, The Lesser and Greater Keys of Solomon, The Sword of Moses and others. Dr. Lisiewski clarifies dozens of technical points critical to successful magical operations, including the most feared and desired one: evoking a spirit to physical manifestation. Alchemy, mysticism and even modern Science of Mind and New Thought are all examined in their relationship to Medieval magic. In addition, Mark Stavishs editing and extensive commentary on the original text, places the material in the context of the magical and philosophical traditions of both East and West, thereby adding valuable insight into the nature of magic as a living tradition.
