

How to Buy Antiques at Bargain Prices!

Antiques author, John Gollehon, doesn't believe in the old adage about buying low and selling high. He says only half of it is true. If you buy low, you don't have to sell high to make money. And being able to sell at more reasonable prices, you'll sell more! Collectors who have no intentions of selling can also benefit from his new book. After all, no one can argue that getting a good buy is half the fun! Everything from what to buy to how to buy, and when to buy to where to buy, is clearly explained. Plus, a full chapter is devoted to a long list of collectible categories, rated in terms of demand, trend, and value. *How To Buy Antiques At Bargain Prices!* is the first book that actually teaches you what others have learned through years of experience. That's right! Consider it your shortcut to successful antiquing!
